Dear Parents,

We are conducting a study examining the role that home and neighborhood environments play in physical activity and screen time for adolescents with autism.

Parents of adolescents (aged 10-17 years) who live in urban areas (such as cities and towns) are invited to complete a brief online survey. All responses will be anonymous and confidential.

Click to Survey

*All participants who complete the online survey will have the option to enter a drawing to win one of five $40.00 gift cards*
